The first group of people who came to the city were the Japanese. They came to the city in the early 19th century and they stayed there for a long time. They were the first people to come to the city and they stayed there for a long time. They were the first people to come to the city and they stayed there for a long time.

There are many people who come to the city every day. They come to the city for work, for school, for shopping, for entertainment, for everything. They come to the city for work, for school, for shopping, for entertainment, for everything. They come to the city for work, for school, for shopping, for entertainment, for everything.

The city is a very big city. It has many people, many buildings, many cars, many things. It is a very big city. It has many people, many buildings, many cars, many things. It is a very big city. It has many people, many buildings, many cars, many things.

The city is a very big city. It has many people, many buildings, many cars, many things. It is a very big city. It has many people, many buildings, many cars, many things. It is a very big city. It has many people, many buildings, many cars, many things.

Other findings of this study are in line with previous research, showing that the majority of the sample (70%) was male, which is consistent with the gender distribution of the population. The study also found that the majority of the sample (70%) was aged between 18 and 24, which is consistent with the age distribution of the population. The study also found that the majority of the sample (70%) was from the urban area, which is consistent with the urban population distribution. The study also found that the majority of the sample (70%) was from the middle class, which is consistent with the middle class population distribution. The study also found that the majority of the sample (70%) was from the middle class, which is consistent with the middle class population distribution.
